

EUROCAVE

Première collection

Everything you need to mature your wine.

The *Première* wine cabinet is designed to allow your wine to mature in the best possible conditions.

Concealed beneath its bold lines lies all the brand's expertise. Take your first steps into the world of EuroCave.

Manufactured in France

Première.

French manufacturing.

All EuroCave wine cabinets and the Tête à Tête wine by the glass solution are hand manufactured in France and come with the highest Origine France Garantie label.

According to the storage capacity required, the *Première* collection is available in 3 cabinet sizes. It can hold 74 – 234 bottles according to the model.

The same conditions as a natural cellar

Exclusively designed to mature your wine, *Première* recreates the exact same conditions found in a natural cellar to bring your wines to their prime:

- A constant, consistent temperature thanks to double hot/cold control. Ideal maturing temperature 12°C.
- Suitable humidity levels. The walls in embossed aluminium participate in the process.
- Constant ventilation ensured by a ventilation inlet at the top and bottom of the cabinet.
- UV protection guaranteed for both the solid and glass door with highly effective UV filtration.
- Extra vibration protection is ensured through the highly engineered cabinet design including a separate compressor to the cabinet body.
- Suitable, optimised storage.

Customisable

Première brings together an attractive design and advanced technology. The collection has three colourful options to choose from to make your cabinet stand out.

- Available with a solid or glass door and a choice of satin silver, passionate red or deep black door frame.
- Outstanding ergonomics thanks to its user-friendly control panel.
- Lighting system to assist with the viewing of bottles and labels.

Versatile

3 types of shelves are offered for maximum flexibility, in order to most closely match your requirements. Opt for storage shelves for larger capacity, sliding shelves fitted with the “Main du Sommelier” (The Sommelier’s hand) for easy access to bottles, or display shelves to showcase your best bottles. For maximum flexibility, EuroCave allows you to combine these different shelves inside your wine cabinet.

PATENTED

Patented

La Main du Sommelier

The “Main du Sommelier” (Sommelier’s hand) has been developed by EuroCave to provide a unique and flexible bottle support for all bottle shapes and sizes, fastened to the shelf. It ensures that any vibrations do not affect your cherished wines. Its design came about from working with someliers, so it seemed only natural to name it after them.

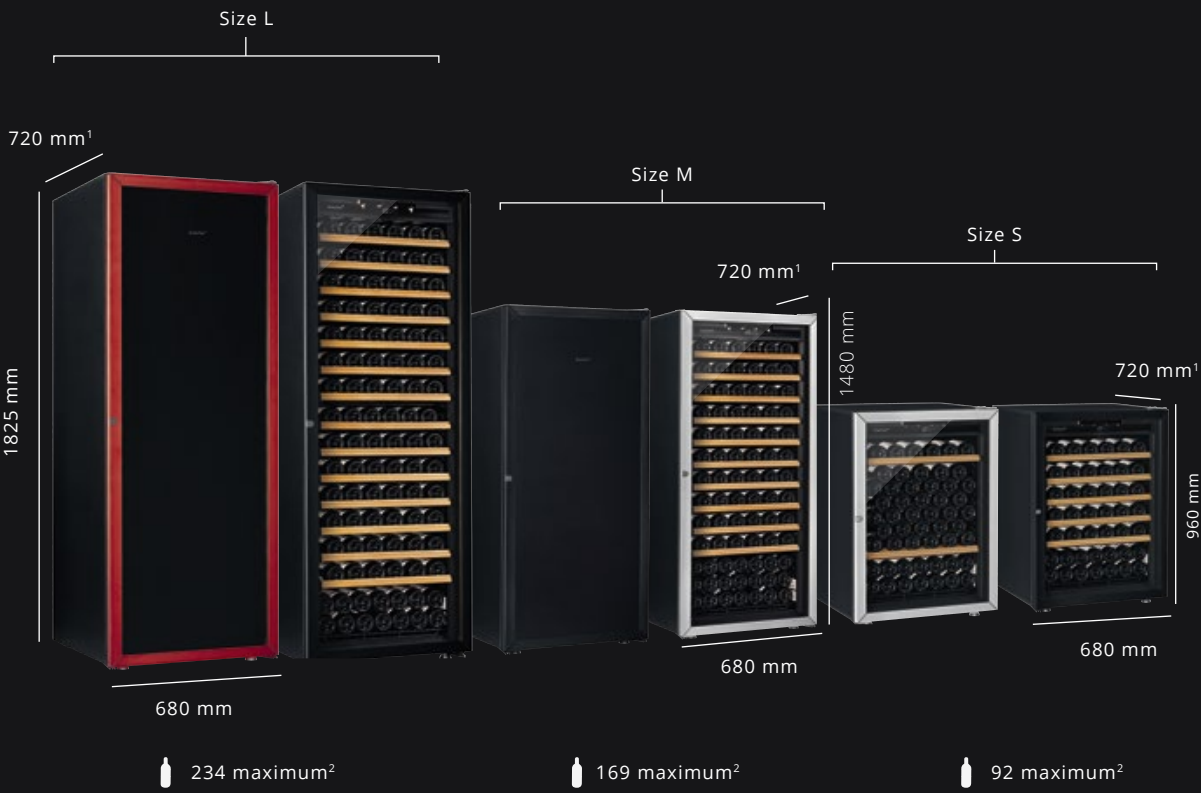

Storage shelf
77 bottles

Sliding shelf
12 bottles

Display shelf
22 bottles

Features

Use	Design	Equipment	Shelves

The EuroCave difference

Because your wine drinking experience is important, EuroCave has created wine serving and storage solutions so that each tasting experience offers the full array of emotions, mirroring your encounter with the wine producer. And if, throughout the world, the best bottles are stored by EuroCave, it is because we are trail-blazers in terms of always having had this bold and passionate requirement of being the faithful interpreter of time that passes.
